SYNOPSIS

Cybercrime: Challenges and BITCOIN

Cybercrime issues – a (very) short introduction about „what is called cybercrime"

What is BITCOIN? – relation to „real" currencies (e.g. exchange rates) – how to get bitcoins (issues of „mining" bitcoins) – background – security – value – volatility issues – anonymity

Bitcoin and crimes – (again) anonymity – malware and mining –susceptibility to different kinds of crime (money laundering, theft, Ponzi scheme etc.) – criminal bitcoin cases
